

# Call Center Manager for Qualtrics

## PHONE, WEB, AND MIXED MODE SURVEY MANAGEMENT FOR QUALTRICS CALL CENTERS

WinCati Call Center Manager (CCM) adds automated sample and call management, productivity reporting and mixed mode interviewing to Qualtrics. It works for you like an expert supervisor making thousands of decisions every second to ensure that surveys are administered rigorously and to your exact specifications. Users include marketing research firms, political pollsters, universities, research institutes and government agencies. CCM can be used effectively for customer and employee feedback surveys.

Call Center Manager incorporates mainstream PC hardware and software. It supports voice over IP (VoIP) phone systems to lower your interviewing costs and virtual private networks (VPN) to give you the option of having supervisors and interviewers work in your call center, offsite or from home.

Call Center Manager adheres to research standards set by the American Association of Public Opinion Research and the Centers for Disease Control and Prevention, and complies with the Federal Electronic and Information Technology accessibility Act and FEMA security requirements.

Sawtooth Technologies, Inc.  
1500 Skokie Blvd., Suite 510 Northbrook, IL 60062
